

YOU ARE THE ONE!

The responsibility for Safety rests on your own shoulders. The more you are aware of jobsite hazards and have the ability to recognize them, the safer your job will be for you! WISHA Consultation will offer a series of classes in Construction Safety Training designed to help you become more aware of the safety and health issues surrounding you on the jobsite each day. Classes will be held on Tuesdays or Thursday from 5-7pm unless otherwise noted.

Remember, your safety is your responsibility!
